

HazScan

Benefits

No one else has these features:

- Searchable Regulations
- Updates in real time
- Integrated with *your* shipments
- Tailored to *your* site and people
- Engaging training
- Individual tracking of quals
- Deployable via handheld
- Low lifecycle cost
- Simplified compliance reporting

Training tailored for *your* inspectors at *your* location, delivered to their handheld, laptop or desktop, integrated with a searchable database of constantly updated regulations.

That's the HazScan advantage.

HazScan, Inc. protects the global supply chain by equipping transportation professionals with accurate and timely information through easy-to-use tools and tailored instruction.

HazScan

- Protecting the Global Supply Chain -

The Problem

"The current system is: 'try to remember as much as you can'. New regulations and constant changes make it difficult. We carry our time-worn 49 CFR copies—including notes and latest cut and paste changes. An online tool, accessed from our truck computer or handhelds would increase our efficiency and accuracy."

~ CHP Patrol Officer Irvin Jacobs

The Impact

- 4 billions tons of hazmat worth \$446 billion are shipped every year
- 10% of all intermodal shipping containers carry hazmat – probably some of yours.
- Between 1998 and 2006 there were 10 major hazmat catastrophies, and uncounted minor ones – are your inspectors prepared?
- 2006 Survey: 1 in 10 hazmat containers had deficiencies - would you be able to spot them?

Improving safety

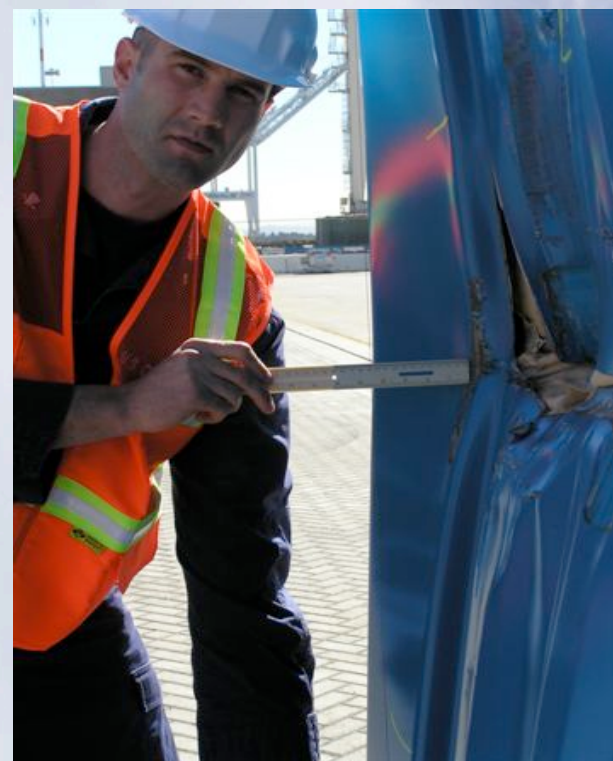

"Before we got the HazScan system, we were always on the phone getting 'mostly' the right answer, or spent a lot of money on consultants. Now, our people get a perfect answer, in seconds, for 90% less cost. They also know more because the tailored training makes the information "sticky". Without HazScan, our inspectors would still be in the Stone Age!"

~ U. S. Customs, Chief Inspector Felix Wolfe

Leading the industry

"Training is often lacking due to expenses and time away from the office. Having an online database and relevant, easy to understand online training is a huge benefit for all enforcement agencies and the shippers themselves. The HazScan system puts us all on a level playing field and makes us all safer."

~ U.S. Coast Guard, Chief Marine Science Technician Gary Brunet

With HazScan, you'll know if that crack is too big, and then remember the regulation for next time.
